

FULL TIME ELECTRICAL ENGINEER

(Product development/ Consumer electronics/ Wearables)

Company Overview

Origami Labs is an innovative technology startup based in Hong Kong that tackles interesting problems and makes products that impact the world.

Our flagship product is ORII, the world's first smart ring that uses voice assistant technology to let wearers send messages and make phone calls in a discreet and stylish way. ORII launched globally in 2017 and garnered 300+ media mentions, including, TechCrunch, Engadget, Mashable, The Verge, GQ, and Hypebeast.

Engadget: *"A more natural way of interacting with my voice assistant."*

Mashable: *"It's literally never been easier to take a call."*

Hypebeast: *"The next step forward in wearable tech."*

Backed by the HK Alibaba Entrepreneurs Fund, Cyberport incubation, and The Mills Fabrica tech style accelerator, we founded Origami Labs to bring together energetic, pioneering people to build ground-breaking products and services.

Role Overview

The Electrical Engineer plays a critical role in supporting product development, prototyping, testing, and manufacturing activities. The position is intended for an experimenter and tinkerer, with a passion for hands-on product development and a desire to learn about consumer electronics design and how to bring innovative products to market. The right candidate will likely have experience in hackathons, creating their own hardware projects, and connecting their own apps. This position reports to the CTO.

Job Duties

- Work with our cross-functional teams to define product requirements
- Hands-on ability to make proof of concept prototypes for testing product features
- Imagination to explore next generation functionality through hardware, firmware and app integration
- Assist with the coordination with engineering and manufacturing partners in production
- Conduct component sourcing and selection research
- Work in fast pace team setting in collaboration with marketing and design

Requirements

- Studied Electrical Engineering, or relevant work experience
- Experience with hardware prototyping, using platforms such as Arduino, Raspberry Pi, STM to build proof of concept
- C++, Java, MATLAB expected, Python preferred
- Experience with CAD (Pro E, Fusion 360, Solidworks etc) helpful
- A team player with high level of creativity and passion for startups and product development
- Strong written and spoken English is required; Cantonese and Mandarin speaking preferred
- A good sense of humor is always a benefit!

Details

- Willing to sponsor working visa for qualified candidates
- Office is based in Kowloon Tong
- MPF and health insurance
- Salary \$17 - \$21K/month
- Introduce yourself to us at venus@origami-labs.com

If you have a hunger to build something truly new, work with an experienced and closely-knit team, we want you on board!

**FULL TIME MARKETING & OPERATIONS SPECIALIST
(Consumer Product Company)**

Company Overview

Origami Labs is an innovative technology startup based in Hong Kong that tackles interesting problems and makes products that impact the world.

Our flagship product is ORII, the world's first smart ring that uses voice assistant technology to let wearers send messages and make phone calls in a discreet and stylish way. ORII launched globally in 2017 and garnered 300+ media mentions, including, TechCrunch, Engadget, Mashable, The Verge, GQ, and Hypebeast.

Engadget: *"A more natural way of interacting with my voice assistant."*

Mashable: *"It's literally never been easier to take a call."*

Hypebeast: *"The next step forward in wearable tech."*

Backed by the HK Alibaba Entrepreneurs Fund, Cyberport incubation, and The Mills Fabrica tech style accelerator, we founded Origami Labs to bring together energetic, pioneering people to build ground-breaking products and services.

Role Overview

The Marketing & Operations Specialist role offers a broad range of work experience that exposes you to all aspects of starting and operating a business. Directly reporting to the Chief Operating Officer, this role supports critical daily activities of the company, including customer engagement, promotional events, logistics, talent management, and planning. The ideal candidate is passionate about building things from the ground up and enjoys being part of a tightly-knit and fast moving team.

Responsibilities

- Building the processes and systems that allows the company to move forward quickly, efficiently, and professionally, including HR, finance, and logistics processes
- Supporting market develop through organizing and running exhibitions, liaising with marketing partners, and coordinating with distributors
- Empowering the other teams in the company by ensuring they have the right resources at the right time, and by creating an optimal working environment and culture
- Engaging customers to gain market insights through events and handling customer queries

Job Requirements

- Strong ability and passion for organizing, planning, and communicating
- Ability to liaise with external partners with maturity, attention to detail, and diplomacy
- Thrive in a fast paced environment and able to manage multiple projects at once
- Strong desire to be exposed to different aspects of business
- Strong command of spoken and written English and Cantonese required; Mandarin a plus but not required
- Accounting, marketing, or customer service background useful but not requirement

Details

- Monthly Salary: \$13,000-\$17,000
- Paid leave: 14 days
- Mandatory Provident Fund (MPF)
- Health insurance coverage
- Office is based in Kowloon Tong
