IT Network Engineer

Saccade Capital is a proprietary trading firm with businesses predominantly in Asia, dealing in cash equities, derivatives and FX instruments. We seek for a Network Engineer in a full-time basis in Hong Kong. The role demands a self-motivated individual with excellent critical thinking and risk based approach over technology and operations tasks.

Role attributes:
- Design, implement, optimize and support network infrastructure;
- Maintain, update and create monitoring tools and dashboards;
- Ensure network infrastructure meets internal demands of performance, resilience and stability;
- Installation, setup and update of servers and network components at the company's Data Centers.
- Maintenance and creation of technical documentation related to every day operations, system configurations and system upgrades;
- Ensure internal policies and best practices are implemented in all network infrastructure;

Requirements
- Qualifications in Computer Science, IT engineering or Technology with strong academic results;
- Strong knowledge in Data Centre management;
- Strong project management and execution skills;
- Strong knowledge in network troubleshooting and optimization, strong knowledge of Redhat/Centos admin troubleshooting;
- Strong knowledge of Linux environments, LDAP, VMWare, DNS, Nagios and Logstash;
- Strong knowledge in hardware network devices: Cisco OS (ASA, IOS) and security;
- Experience in automation and scripting (shell scripting);
- Strong knowledge in multicast environments;
- Experience with Linux and Windows systems;
- Good understanding of TCP/IP networks.
