

We are looking for Front-End Developers

Incubated by Cyberport, Recipio (www.recipio.com) is looking for tech elites to join our core development team.

Recipio is an AI-backed FinTech startup, specializing in optimizing the post-payment cycle in retail for both consumers and shops. Our app allows consumers to consolidate all the post-payment elements after shopping, including membership, warranty, expense management, and many other aspects. Retailers can then utilize the big data for analytics.

Over 90% of total retail sales in Hong Kong still comes from offline physical stores, and the innovation and data aspect of offline retail is still underserved. Our app will become the go-to-tool for all consumers after their purchases, and will provide retailers with valuable offline cross-sector retail analytics.

Our app is launching very soon. We are looking to expand fast, and we would like to have you to be one of us. We are looking for candidates who possess strong technical background. Our tech development is growing rapidly and we need a top-notch app developer to further develop the mobile application. Most importantly, we would like to have passionate candidates who want to make great changes to society.

Job duties include (but not limited to):

Develop and maintain Recipio mobile app
Direct report to CTO

Skills and experience (any of the following):

Swift for iOS / Java for Android

Requirements

Tertiary Education in computer science, software engineering or related subjects is preferred
Experience in building and deploying iOS/ Android apps is highly preferred

Compensation

\$20 - \$30K/month (Negotiable)

Application Method and Deadline

Please submit your application (including CV and cover letter) to info@recipio.com.
Applications will be reviewed on a rolling basis.
