WORK@IBM

IBM is a leading cloud platform and cognitive solutions company. Restlessly reinventing since 1911, we are the largest technology and consulting employer in the world, with more than 380,000 employees serving clients across 170 countries. With Watson, the AI platform for business, powered by data, we are building industry-based solutions to real-world problems. For more information, visit www.ibm.com.

Here at IBM Global Business Services (GBS) we live and breathe a client-first mindset in everything we do. We understand our clients, advise them and deliver meaningful value to them. We inspire them and help them to become their market leaders. We call it The IBM Way and we're looking for people who share this mindset.

Working in IBM, you will be able to leverage latest technology including Microservices Design, Kubernetes, AWS, DevOps, API, etc to design, develop and realize solutions helping clients to transform industries.

WHAT WE OFFER

Work in a fast learning environment with guidance from IBM Architect and Application professional who has huge amount of experience to deliver different projects in Hong Kong in more than a decade. You will join one of the Enterprise level projects and gain the real application consultant experience. You can easily reach out the latest trend in an international company with wide spectrum technology such as Cloud solution, Machine learning, Big Data and FinTech.

Projects

We have following projects with opening that welcome all of you to join us.

• Cloud Native development for an eCommerce Platform using latest cloud technology such as AWS, Microservices design with DevOps adoption, Single Page Application, Open API, Big Data and Machine Learning system integration. Project will be executed by agile delivery approach with direct client interactions to co-develop the new platform.

• HR solution development in Enterprise level for various industries

• OpenAPI banking solutions with API technology

• Faster Payment solutions for multiple banks

Role and Job Duties

We are looking for full stack developers or system analyst that are capable of working with client directly and using latest technology to help resolve business problems.

Under the guidance of architects, team leaders and project managers in IBM Global Business Services (GBS), you are required to perform application design and development including but not limited to the following tasks:

• Assist architects to perform system micro-design

• Develop application program based on specifications including cutting edge technologies such as Java, node.js, AWS, ICP, microservices design, DevOps tool, REACT, Angular.js

- Automate test script and execute test cases for continuous testing

- Develop one-click build script and delivery pipeline for continuous integration

- Involve in scrum team to deliver the project in Agile manner

- Participate in review and retrospective for continuous feedback and improvement

- Perform application support, problem diagnosis and fixing

- Support project manager on management administrative tasks such as status reporting.

- Depends on your years of experience, you will be given chance to lead a scrum team for continuous delivery.

Requirement

- Possesses adequate knowledge and concepts in application programming.

- Target for young talent with less than 5 years relevant working experience or new graduates

- Student who studies Computer Science, Computer Engineering, Information Systems or equivalent degree courses is preferred.

- With passion in technology.

- Possesses fluent written & spoken English and Cantonese. Mandarin will be an advantage.

- Self-confident communication and presentation skills

Application method: Please send your CV to **hkgbsrec@hk1.ibm.com**
