Junior Software Developer – Singapore

We are looking for a junior Software Developer with C++ and Python experience to join our Commodities business, global development team.

You will be joining a team of enthusiastic and driven IT professionals who strive to deliver the highest quality and innovative technological solutions for Commodity Markets and Finance business within the Commodities and Global Markets (CGM) group in **Singapore**.

In this role and as part of the team, you will work closely with the commodities trading team in Singapore and Asia, where the business relies on in-house platforms for trading and risk purposes. You will also be working together with technology team in Sydney and other global offices. Key duties will be working with front office trading team to translate business strategy into clear technical solutions & developing high quality, low maintenance software solutions for our key trading and risk systems.

The team employ a variety of technologies and solutions to enable the commodities trading business and also integrate with other downstream processes. A strong aptitude for investment products or trading/risk platforms will set you apart, as well as the willingness to get involved across a range of technologies and disciplines. Our strong geographically-dispersed team will offer you the opportunity to learn from senior experienced developers around the world.

You don't need to have domain knowledge to be successful in this position, we are looking for an enthusiastic computer engineering graduate, with some professional experience, C++ and Python experience & excellent communication skills.

The Corporate Operations Group (COG) brings together specialist support services including workplace, human resources, market operations and technology. COG's purpose is to drive operational excellence through business-aligned services with a focus on quality, cost and risk. COG comprises the following divisions: Business Improvement and Strategy, Business Services, Human Resources, Market Operations, and Technology.
