

Technology Graduate Programme.

Your future starts at HKEX.

Careers within the heart of Asia's financial markets.

As one of our Technology Graduates, we'll help you to lay the foundations for a rewarding and challenging career in the financial services industry. Our intensive, 18-month development programme combines interactive learning, IT skills training, project participation and senior management exposure, plus on-the-job experience. You'll also have the opportunity to work with industry leaders inside and outside the business, who will help you to grow and succeed.

We are looking for candidates with a passion for technology, and a degree in IT, Computer Science or a related discipline.

Are you ready for a new challenge?

Do you want to make a difference to the financial markets with innovative technology?

If yes, then join us as we continue to strengthen our position as global markets leader in the Asian time-zone: *Connecting China, Connecting the World.*

Technology Graduate Programme Overview

Our HKEX Technology Graduate Programme aims to nurture bright, young talent.

As one of our Technology Graduates, we'll help you to lay the foundations for a rewarding and challenging career in the financial services industry. This intensive, 18-month development programme will combine interactive learning, IT skills training, actual project participation and senior management exposure, plus on-the-job experience. You'll have the opportunity to work with industry leaders inside and outside the business, who will help you to grow and succeed.

We are looking for candidates with a passion for technology, and a degree in IT, Computer Science or a related discipline.

Are you ready for a new challenge? Do you want to make a difference to the financial markets with innovative technology? If yes, then join us as we continue to strengthen our position as global markets leader in the Asian time-zone: Connecting China, Connecting the World.

Classroom and on the job training

As a HKEX Technology Graduate, you will be provided with all the training and support that you need; helping to nurture your leadership skills, teamwork abilities, technical knowledge and soft skills.

Highlights will include leadership challenges, skills development, presentations, and much more. Your ongoing training will continue to be offered throughout the 18 month programme, and as a Technology Graduate, you will gain valuable knowledge, skills, experience and exposure, helping you to prepare yourself for a long term career in IT.

Technology specialisation

As a HKEX Technology Graduate, you will have a chance to familiarise yourself within the Software Development and System Infrastructure disciplines. You will learn about management techniques through a project's life cycle, in terms of project initiation, collecting user requirements, the selection of technology and solutions, system development and architecture, quality assurance and on-going support and maintenance. On the Infrastructure side, you will participate in a broad-range of infrastructure projects, from network, server, storage, cyber security, plus mobility, cloud and collaboration technologies.

Join us to learn what it takes to maintain a robust IT infrastructure, supporting the continuous operations of the global markets leader in the Asian time-zone.

Information Technology

The Information Technology Division (ITD) is responsible for the secure, reliable and continuous operation of our technology platforms at HKEX. ITD helps our business to capture the benefits of the accelerating pace of technology change in our industry. We are working to ensure that our core systems help to facilitate improvements to market efficiency; that we are embracing the application of new technologies across, and beyond, our value chain to deliver a better market experience and cost-effective outcomes; and we are exploring potential strategic partnerships to venture into new horizons in Fintech and data markets.

We have over 300 professionals supporting our full-suite of IT functions in systems infrastructure and operations, application system development and support, quality assurance, security management, system architecture, and hosting services.

Role Description

- Gain experience across a wide-variety of different IT functions
- Collaborate with internal business stakeholders and external technology partners to provide optimal business and technological solutions
- Support the project initiation and implementation life cycle by learning and developing project management and technical skills
- Participate in shaping and enhancing the technology landscape of HKEX
- Gain exposure and keep abreast of new technology development and best practices in the IT industry
- Develop an understanding of our products and services, business operations, and regulatory and compliance framework
- Partner with senior management, staff at all levels, and professionals in the industry

Requirements

- Fresh graduate in 2020, or recent graduate in the last two years with less than 2 years of work experience following graduation
- Bachelor's degree or above, majoring in IT, Computer Science or related disciplines
- On track for, or achieved, minimum 2:1 degree (UK), or 3.5 GPA (Hong Kong or US) or equivalent
- Commercial awareness and interest in global financial markets
- Some familiarity with the financial services sector of Hong Kong
- Excellent command of both written and spoken English and Cantonese. Ability to communicate in Putonghua would be an advantage

Interested students please send your most updated CV and transcript to HRMTRecruitment@hkex.com.hk on or before 6 March.
