Reporting to CTO, Full-stack Programmer is a key position for website maintenance and support, with good opportunities to learn more about the financial industry and tech business. Major tasks include website enhancement, maintaining database and understanding the flow of our system, communication with external parties and occasionally performing ad hoc duties as required.

**Job Duty:**

- Developing front end website architecture.
- Designing user interactions on web pages.
- Developing back end website applications.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- Working alongside graphic designers for web design features.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in web applications and programming languages.

**Job Requirement:**

- Degree holder in Computer Science, statistics, Data science or other related disciplines
- Strong organizational and project management skills.
- Proficiency with fundamental front end languages such as HTML, CSS and JavaScript.
- Familiarity with JavaScript frameworks such as Angular JS, React and Amber.
• Proficiency with server side languages such as Python, Ruby, Java, PHP and .Net.
• Familiarity with database technology such as MySQL, Oracle and MongoDB.
• Excellent verbal communication skills.
• Good problem solving skills.
• Attention to detail.
• Big data/ machine learning exposure would be a plus
