

2021 YMTC Recruitment Program

Yangtze Memory Technologies Co., Ltd. ("YMTC"), established in Wuhan, China in July 2016, is an IDM memory company focusing on the design, production, and sales of 3D NAND flash memory. YMTC provides 3D NAND wafer, die, and solutions including embedded memory, cSSD, and eSSD for a wide range of applications including mobile devices, PCs, and data centers.

In October 2017, YMTC successfully designed and manufactured China's first 3D NAND flash memory by combining independent R&D and international cooperation. In September 2019, 64-layer TLC 3D NAND flash memory with innovative Xtacking® architecture was officially put into mass-production. Up to now, YMTC has R&D centers in Wuhan, Shanghai, Beijing and other places. There are more than 5,000 employees worldwide, including about 2,000 R&D engineers. YMTC is committed to becoming a global leading NAND flash memory solution provider through persistent efforts and technical innovations.

This year they have over 400 positions all over China.
